

LSCS 2006
**Third International Workshop on Local Search
Techniques in Constraint Satisfaction**

September 25, 2006

Programme

- 9:00-9:10 *Workshop Opening*
Yehuda Naveh and Andrea Roli
- 9:10-9:35 Combining Adaptive Noise and Look-Ahead in Local Search for SAT
Chu Min Li, Wanxia Wei and Harry Zhang
- 9:35-10:00 Modelling Clique Problems for SAT Local Search
Steven Prestwich
- 10:00-10:25 An Empirical Study of Multi-Point Constructive Search for Constraint Satisfaction
Ivan Heckman and J. Christopher Beck
- 10:25-11:00 *Coffee-break*
- 11:00-11:50 *Invited talk*: Title to be defined
Pascal Van Hentenryck
- 11:50-12:15 Boosting SLS Performance by Incorporating Resolution-based Preprocessor
Anbulagan, Duc Nghia Pham, John Slaney and Abdul Sattar
- 12:15-12:30 *Post deadline abstract*: Generic Incremental Algorithms for Local Search
Magnus Ågren, Pierre Flener and Justin Pearson
- 12:30-12:35 *Workshop Closing*
